

# DRUIDIC MEDICINE

## SYNOPSIS

Druidic Medicine not only helps people recover from their particular pathological imbalances. It also helps them permanently maintain the highest possible standards of health.

Before even being accepted for Druidic cares, the consultants must first prove as clearly as possible their absolute understanding of the whole operation. They especially have to adopt a non-ambiguous attitude as to the purely spiritual nature of those cares. People do not necessarily have to be spiritual themselves; they just have to accept not to contaminate, with materialist intents or with anti-spiritual attempts, the implementation of the Druidic procedure.

Before explaining Druidic cares from a health perspective, we must first reposition Druidism in its true philosophical and spiritual dimension.
