

FULL SPECTRUM MIND DOMINANCE

SYNOPSIS

The following document "FULL SPECTRUM MIND DOMINANCE", consists of three separate pieces: "Prologue to SDI" written by Dr. L. Dee Jacobsen, "Subliminal Influence Technology" (SIT) written by Philippe Sauvage, and "Brief Existential Resume" written by Philip Savage in the spring of the year 2000. The attached documents fully describe Subliminal Distant Influentiality (SDI) which is the unique and powerful mind-force technology developed, tested, and implemented by Philip Savage over the past 25 years. SDI can be utilized to recover health or to modify human thoughts and behaviors at a distance, subliminally, without the subjects' knowing.

Given the nature of his abilities, interests and need for employment and security/citizenship, Mr. Savage while living in the U.S. was sincerely seeking work with an appropriate U.S. agency. He was prepared to undergo the most rigorous scientific testing and security-related scrutiny. The second article is intended to provide a practical explanation of Subliminal Distant Influentiality (SDI) and its invaluable applications. The "beauty" of this technology (and it's most controversial aspect, as well) is that the results will occur in a purely subliminal fashion (way beneath the threshold of the subjects' conscious perception) and can be successfully carried out from a distance without signal attenuation. There are no known protective countermeasures for subjects exposed to this subliminal mind-reset. Most importantly, SDI always works and never leaves "tracks."

The third article speaks of Philip Savage himself and his background. He has spent his whole life utilizing and improving his ancestral and subliminal mind-techniques through his own scientific knowledge and through all sorts of scientific experiments and private assignments. He is ready, any time, to duplicate or, indeed, to surpass his previous and current use of Subliminal Influentiality.
