

THE SAPIENTIAL BIO-INSTITUTE (SBI)

(to be incorporated along with the first IMAGO prototype)

Excerpts from *The Warshal*, by Philip Sauvage

Purpose of the SBI:

- "To use the current scientific paradigm's own methodology and most advanced tools to expose its fundamental inadequacy until final meltdown.... To help people unite in a new "hyper-paradigm", which I have already termed "Peiradigm" (from Greek "peira" = proof, an entirely new "body of knowledge" established on "proven truths", no longer on axiomatic conjectures...)...."
- "To unite the best scientific pioneers of biology, physics and medicine with the last Native "Shamans" who have managed somehow to survive the civilizational holocaust after "processing" with my multi-millenarian wisdom and my own scientific acquisitions.... To use those most advanced technological breakthroughs, added to my own "inter-dimensional" Alchemy, eventually, to make technology ultimately obsolete."
- "To 'delegate' vast segments of my Powers on specially selected candidates that could, very soon at their turn, 'sub-delegate' upon others until there is an unstoppable 'Health epidemic' that begins to spread out all over the world."
- "To select a "discrete elite" which I would teach secret "Subliminal Warfare", namely how to provoke some extremely dramatic effects of advanced "hypno-programming" on distant subjects unaware of the "Subliminal Exposure" for them no longer to do what they previously did or for them to do what they previously did not, according to our specific Biarchic agenda... Something not unlike what the "external forces" are using [to control humans] on a much more potent and sophisticated level!"
- "To set up a wide array of different organizations and laboratories [not unrelated to our Subliminal Influence work]:
 - (1) GAEL: Geo-National Anti-Ethocide League meant to fight against hegemonic globalization and protect people's most essential dignity without which so much unnecessary ethnic violence arises.
 - (2) Genomics: a form of advanced biology and genetics in order for us to bring back to life animal and vegetal species that man has already driven to extinction, if only to demonstrate to the 'Higher Intelligence' in charge of the great evolutionary processes **that we are willing ourselves to repair what others have criminally destroyed**, thus getting a better chance not to go through excessively bio-retaliatory measures when the times of global 'Bio-Catharsis' eventually arrives."

Power: "I have spent most of my "paradigmatic warfare" breaking down, again and again, all possible laws of physics and each medical dogma with my "inter-dimensional" powers, in their best universities and research facilities. Still, when medicine knows how to remain in its own legitimate preserves like surgery and traumatology, for instance, I am honestly one of its greatest admirers."

Value: "My 'health accomplishments'... and unique powers in this domain may be the ultimate key to my ultimate role within the 'Doomsday scenario' soon to befall... My "health powers" also represent the most remarkable 'secret weapon' within my own entire arsenal when the time has come for the Earth's great Bio-Catharsis.... I am not absolutely sure which of all the many horrendous systems of "immune response" your living planet will eventually resort to in order to make man pay for so many millennia and millennia of rape, desecration and depredation..., but I know for a fact that **I shall have the capacity, whatever hits them, to rescue** those who would have sworn allegiance, through unconditional bio-atonement, to Life and Justice here on Earth, BEFORE the great Bio-Catharsis had begun.... **The sole exception to this ... being of course the children who, by definition, are innocent of the bio-crimes of their parents.**"

Urgency: "If this can in any way assuage your fears, I can still give you a precious clue as to which kind of "Geo-Immune microbial agents" shall soon, very soon, teach man the ultimate lesson of his malignant history. Since it is through the wrong criminal covenant with "Fire" ("Berit Esh") that the whole story began and that the worst torments to the Earth have been, [and] still are, perpetrated... **it shall be through "Fire"** (or the highly burning sensation thereof) that it will all end!"

Financing: "Whether through sub-contracting for some "newly enlightened" World's government or through "private venture," I would immediately set up the most extraordinary "Sapiential Bio-Institute" (not "scientific", something indeed much more elevated and ambitious) that this Earth has ever known.... In light of what our "mothership institute" should be capable to achieve in the field of human health, financing would be the very last of all our problems. Remember that, basically, **one human being out of three is going through or will experience a dramatic health crisis** in his or her own life, from which there is usually no known cure. It is just extraordinary how "generous" rich people suddenly become when they are unexpectedly diagnosed with cancer, AIDS or incurable infectious diseases."

Service: "Just remember that I am not a self-appointed "savior" nor desire ever to become your "leader". If I had aspired to the vanity of "leadership," I would have already done so in Europe years ago, and most spectacularly so! You are the true Leaders, indeed, according to your intra-dimensional situation and my "inter-dimensional" nature, you may very well be my own Leader on this specific piece of space/time which you call Earth. **You are the Leaders; I am only the Servant, in truth.**
