

PHILIP SAVAGE

JOURNEY INTO THE  
ABSOLUTE ELSEWHERE

# PRaise FOR THE JOURNEY

*Journey into the Absolute Elsewhere* is the exposition of a brilliant intellect and divinely inspired spirit committed to Service, Justice and the restoration of the Divine Natural Order here on Earth. It reveals the amazing and unparalleled saga of Philip Savage's often pain-filled life and his inspired decision to shed his previously assigned mantles of "Celtic Shaman and Milenarian Dragon," "Miracle Worker," "Media Star," and more recently, low-profile fugitive from demonic French injustice.

With renewed sagacity and a sense of desperation, Savage details how modern man has forgotten his primordial nature and with it the knowledge of his duty to the Laws of the Divine Natural Order. The resulting movement by most of humanity down the path of technocratic civilization, pseudo-science, unholy war and pestilential destruction has brought life to the brink of extinction.

As a "mutant being" who understands and channels cosmic force from the Divine Transcendental Dimension, Savage articulates his duty to fight without mercy against spiritual entropy. He offers himself as a sacred and Bio-Compassionate Advocate willing to intercede on behalf of all humans who prove themselves true to Nature and free from a culture of domination, predation and overcivilized decadence.

For the first time Savage, the renewed Servant, sets forth new scientific and religious doctrines and political programs with battle plans to be employed by Bio-Loyal Humans in the service of protecting every living thing.

Savage's Bio-Spiritual agenda includes the presentation and elaboration of the religious science of Geonotics whose purpose is to prove the presence of the Divine Spirit dwelling at every level of vital processes. Also outlined are experimental scientifically controlled research programs to investigate the use of Mind-Force (Noiatrics) in repairing cellular function, reclaiming bio-normalcy and restoring man (the deviant cell of the living planet) back to his original homeostatic niche on the Earth. This revolutionary work also includes the creation of a Bio-Ministry within human spiritual health to facilitate Catharsis, Bio-Atonement and the recovery of psycho-behavioral normalcy. The exciting development of a collective Bio-Channeling project designed to enlarge and realign human consciousness is also described.

Heralding a call to Bio-Spiritual servancy, Savage offers a prayer: "May Life, Death and Justice, all Divine in nature, bless us all in our coming sacred mission."
