

**DOCUMENT #15: Mrs. Marina**

**(Husband with Terminal Lung Cancer)**

March 24, 1992

I am writing in order to grant Philip Savage all my faith and my gratefulness for all the good he has brought to my husband since I contacted him in March of 1991.

My husband was urgently hospitalized for two weeks. Two or three days before his return home, I sent his photograph (taken in the hospital) and a lock of hair. Then, he experienced immediately, amazing absolute healing and from the middle of March until October, he went through an indescribably pleasant period without any trouble or infection. For the first time in five years, he was even able to practice his favorite sport! As a matter of fact, one month after having been released from the hospital, the doctors performed on him a new complete checkup:

First, no longer any opacity in his right lung.

Second, all further investigations showed, for the first time, an amazing healing.

Although the doctors were absolutely bewildered by such results, we decided not to acquaint them with Philip Savage's cares. Needless to say how happy my husband was to be in such a healthy condition. His spirits were that high! There is no doubt that sickness is the worst thing on earth... However, since October (when the political police started their conspiracy)... relapse! The infections are back. So is an extreme fatigue. There is nothing else for the doctor to do but desperately provide my husband with repeated shots and high doses of cortisone.

Therefore, I send a new photograph of my husband and, since we place all our hopes upon Philip Savage, whom we admire so much, I beg him to help us in this new terrible daily martyrdom.
